What is Linked {Open} Data?

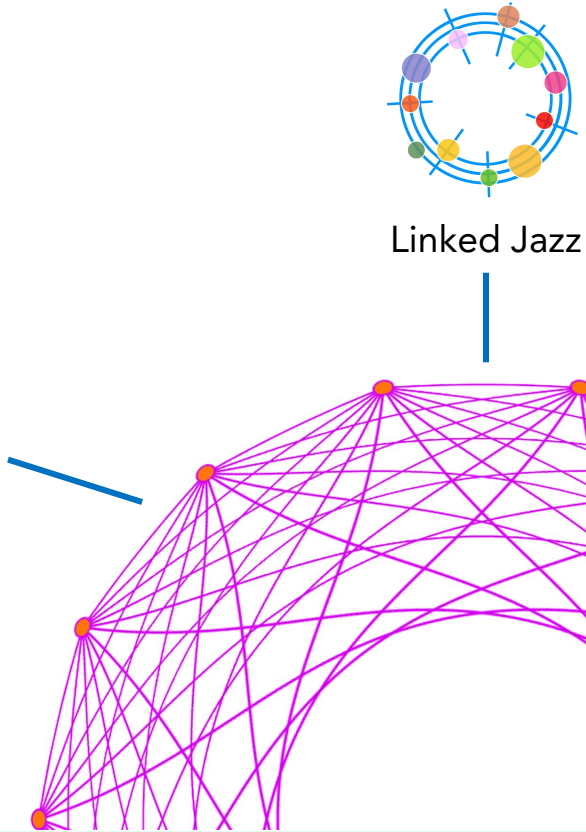

"The Linked Open Data Cloud"
CC-BY-2.0, via http://lod-cloud.net/,

publication of **structured data** to be interlinked with other data

{free the data from silos!}

data can be linked data {LD}
or linked *open* data {LOD}

What does the Linked Jazz Ontology Describe?

Relationships between jazz musicians

Extract names mentioned in interview and assign positive identification to each.

Create RDF triples between interviewee and persons mentioned in the general form of *knowsOf.*

Assign more granular terms to describe relationship between the interviewee and the person mentioned. *Examples to left*

Linked Jazz Data Sources:Transcripts provided by Hamilton College, Rutgers University, The Smithsonian, UCLA, and the University of Michigan.

Next Steps

Visualization of instances of use of Wikidata properties associated with Jazz Musicians by Mollie Echeverría

Select classes and properties for the *Local 496* Project and **Batiste Project** data that can be used to create an expanded Linked Jazz ontology

Select Wikidata properties to include when adding new *Local 496* and **Batiste** entities to Wikidata

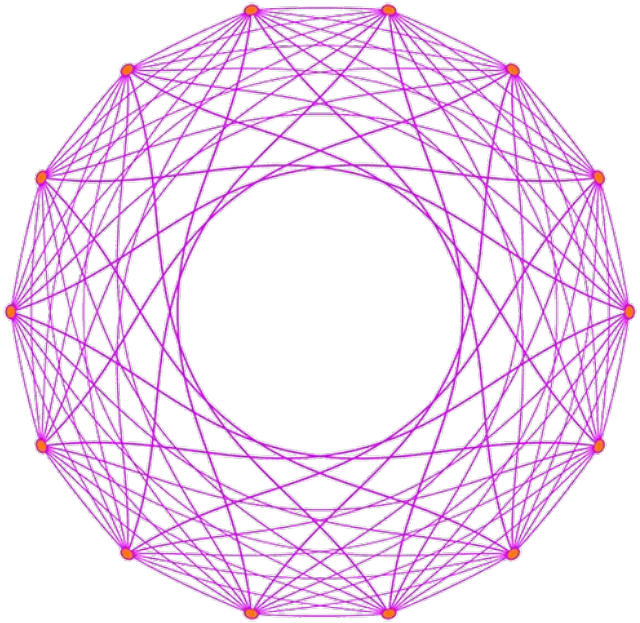

Add "nobody" people to Wikidata

Present at the 2018 New York Archives Conference, to be held June 6-8, 2018 at University of Albany in Albany, NY.
